## Summary

Hello, I am A undergraduate student at the South Russian State Polytechnic University (Novocherkassk Polytechnic Institute) - administration of information systems. I have mastered most of the fundamentals of the Python language and began to learn in depth the language, modules of the built-in library and third-party useful libraries, and also Django 3 framework. The goals of my training are improvement in programming, learning new things in my area (python developing and back-end developing).

---

## Professional Skills

Analytical mindset

Good concentration, assiduity

Algorithmized approach

---

## Applied knowledge

Python  
PostgreSQL  
Bootstrap

Django  
HTML  
Linux & bash

Flask  
CSS  
Git & GitHub

---

## Education

2018 - 2022

The South Russian State Polytechnic University (Novocherkassk Polytechnic Institute) - mathematical support and administration of information systems.

---

## About

### Work preferences

I have no obvious preferences in work. I can perform any tasks according to my skills both in front-end and back-end.

### English level

Intermediate level; I read and understand English texts well, but the written and spoken part is below average.
